Recall # R1609
Recall Date: 5/24/2016
MAX ALT RG MUR OCS NTB16-052

Recall Description:

The Occupant Classification System (OCS) is designed to classify the size and weight of the front seat passenger and, under certain conditions, automatically turn OFF the passenger air bag. The OCS system is designed to only deploy the front passenger airbag when the front passenger seat is occupied by an adult. In the affected vehicles, the OCS software may incorrectly classify the passenger seat as empty when it is occupied by an adult. If the OCS does not detect an adult occupant in the passenger seat, the passenger airbag would be deactivated.

Remedy

The OCS software will be reprogrammed to reduce the potential for classifying the seat as empty. This reprogram will be offered at no charge to the customer and should take less than an hour to complete. Your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact NISSAN or visit Nissan's website.

Recall # PC426
Recall Date: 1/22/2016
ALTIMA HOOD LATCH NTB16-011

Recall Description:
 On some of the affected vehicles, the secondary hood latch may not function properly.

Remedy
 Your Nissan dealer will replace the hood latch assembly. This repair should take less than an hour to complete and will be offered at no charge for parts and labor. Your dealer may require your vehicle for a longer period of time based upon their work schedule.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact NISSAN or visit Nissan's website.

Recall # PC403
Recall Date: 10/19/2015
ALTIMA FUEL TANK NTB15-090

Recall Description:
 On some of the affected vehicles, the fuel tank opening dimension at the point of attachment to the fuel sending unit may be out of specification.

Remedy
 To correct this condition, the Nissan dealer will install a special containment ring between the fuel sending unit and the fuel tank, to help maintain the seal between them in the event of a crash. This remedy should take less than an hour to complete.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact NISSAN or visit Nissan's website.

ICBC Disclaimer

The information supplied by ICBC is a report of the vehicle's status and the vehicle's claims history. Vehicle status shows whether a vehicle is qualified to be licensed and is used to track:

- vehicles sold by insurance companies as salvage
- salvage vehicles which have been rebuilt, inspected, and relicensed
- wrecked vehicles that have been decommissioned and can only be resold for parts

The vehicle status may not represent the vehicle accurately for a number of reasons, including a written-off vehicle that hasn't been reported to the B.C. vehicle registry or a vehicle with major damage that was repaired by its owner. The vehicle claims history is a report of vehicle damage and includes repairs paid by ICBC and outstanding damage estimates. It may be incomplete for various reasons, including the owner did not make a claim to ICBC or ICBC has denied the claim.

In addition, the estimate information may not necessarily reflect the actual cost of repairs, list the area of the vehicle that sustained the greatest force of impact, or indicate the primary area of damage.

Consumers are encouraged to read ICBC's full statement of limitations at <http://apps.icbc.com/registration/vhr/limitation.html>.

ICBC recommends the vehicle be inspected by a qualified mechanic to obtain a more complete assessment of the vehicle's condition.

CARFAX Canada No Reported Accidents™ Badge
